1. The first part of the paper is devoted to a general
discussion of the problem. It is shown that the
problem is of great importance and that it has
not been completely solved. The author then
presents a new method for solving the problem.
The method is based on the use of the principle of
least squares. It is shown that the method is
very simple and that it can be applied to a
wide range of problems. The author then
presents a numerical example of the method.

1. The first part of the paper is devoted to a discussion of the
theoretical aspects of the problem. It is shown that the
problem is equivalent to a problem in the theory of
differential equations. The second part of the paper is devoted to a
discussion of the experimental results. It is shown that the
experimental results are in good agreement with the theoretical
results. The third part of the paper is devoted to a discussion of the
conclusions. It is shown that the problem is solved.
